Cab mounted Large Diameter Transmission Pressure Gauge

This system is for monitoring safe transmission pressure and also acts as a cable tension meter for glider launching as higher cable loads will increase the line pressure.

The ideal 'target pressure' reading can be listed for each type of glider and briefly checked during the launch.

This is also a useful tool to optimise the launch and reduce weak links breaks, especially when training new winch drivers or converting drivers to use your winch.

Price for transmission gauge fitted with braided hose, fittings, mount and bracket - **£138.00**

Price supplied as kit for Club to install - **£108.00**

All Prices are in UK Pounds and exclude shipping, VAT, taxes etc.
