### Skylaunch (Smaller type) Final Drive Oil Change Advice – 11<sup>th</sup> February 2015

**Advice for owners  
of Winches with the  
smaller capacity  
final drive as  
pictured (Right)**

We now recommend renewing the final drive oil every 3,000 Launches or sooner (EP 85w/140 high quality oil from a top brand oil manufacturer, or Skylaunch can supply) not every 6,000 launches as previously advised.

As these final drives only hold 2-3 Litres each it is not a big cost for the oil, but it means this would need changing in between 6,000 launch services.

We believe this will help increase the life of these units.

The later model Skylaunch winches are fitted with a new heavy duty cast iron spool unit design with a large capacity housing.

This holds approximately 8 Litres of oil, so the renewal intervals are extended to 12,000 launches.

Upgrades to the newer design, large capacity final drive is available from Skylaunch – price on application.

**Skylaunch winches  
are now fitted with  
large capacity steel  
final drive housings  
as pictured (Right)**
